Abstract	This view service represents the countries of the world. The data set used in this service is the Countries 2006, European Commission - Eurostat/GISCO data set, which is based mainly on the geometry from EBM v2.0. of EuroGeographics for the members of Eurogeographics, the Global Administrative Units Layer (2006) from FAO (UN) and geometry from the Turkish National Statistical Office. The service operates on data between a scale of 1:100 000 and a scale of 250 000 000. The public data set (3M - 60M) is available under Download link, see below. The full data set (100K - 60M) GISCO.CNTR_2006 is available via the EC restricted download link.
