

## Local Administrative Units, 2019 - Administrative Units - Data set

[Metadata](#) | [Metadata \(XML\)](#)

Title	Local Administrative Units, 2019 - Administrative Units - Data set
Date	2019-02-28
Date type	Creation
Abstract	<p>This data set shows pan European administrative boundaries down to commune level version 2019. . The Nomenclature of Territorial Units for Statistics (NUTS) and the LAU nomenclature are hierarchical classifications of statistical regions that together subdivide the EU economic territory into regions of five different levels (NUTS 1, 2 and 3 and LAU , respectively, moving from larger to smaller territorial units). The LAU classification is not covered by any legislative act. The data set is based on EuroBoundaryMap v. 2020 from Eurogeographics. Geographical extent covers the European Union, EFTA countries, and candidate countries The scale of the data set is 1:100 000. A generalised version is available to all from the GISCO download page. The data contains the National Statistical agency LAU code which can be joined to LAU lists aswell as a field GISCO_ID which is a unique identifier consisting of the Country code and LAU code.</p> <p>Total resident population figures (31st December) have also been added based on the associated LAU lists Note the generalised version should be used for cartographic purposes and should be correctly attributed to @Eurogeographics.</p>

### Extent

#### Geographic bounding box

West bound	-79.7
East bound	62.29

South bound	-26.64
North bound	88.92

## Spatial resolution

Denominator	1000000
-------------	---------

## Lineage

Statement	<p>The dataset is based on the geometry from EuroBoundary Map v2020 (source EuroGeographics). This dataset is not integrated with other GISCO data such as NUTS 2016/ NUTS 2021. Known issues see EBM_2019_LAU_NUTS_Matching.pdf in download package</p> <p>Population figures derive from the annual LAU lists. Member states do not in all cases provide a figure, in these cases the figure for the nearest available year is taken, the reference year for the population figure can be found in the field Year. Population density has also been calculated based on this figure and the area of the polygons in LAEA spatial reference (EPSG:3035) of the original 100K scale data. Population figures are not validated, figures received with the LAU lists are indicative and have analytical purposes such as implementing the DEGURBA.</p>
-----------	---

## Resource constraints

Use limitation	<p>The Commission, its Executive Agencies and European Environmental Agency may use the dataset under the following usage restrictions: <a href="https://webgate.ec.europa.eu/fpfis/wikis/display/GISCO/License+conditions+for+EuroGeographics+Administrative+and+Topographic+spatial+datasets">https://webgate.ec.europa.eu/fpfis/wikis/display/GISCO/License+conditions+for+EuroGeographics+Administrative+and+Topographic+spatial+datasets</a> . Contractors of the Commission, its Executive Agencies and EEA can access the data after signing an agreement form. The agreement form can be requested by the responsible service from European Commission – Eurostat/GISCO ESTAT-GISCO@ec.europa.eu . Once the form has been signed, access will be provided by European Commission - Eurostat/GISCO.</p>
