

Exercise 3 – Modifying an existing map

Input Data: Exercise2\output\previously created file from Exercise 2
\input\EXERCISE2BYGISCO.pdf
\output\EXERCISE3BYGISCO.png

Expected Outcome: This exercise will show how to modify an existing IMAGE map saved with a configuration file, and correct some minor errors

Using the saved configuration file from Exercise 2, we will make some changes to the a map that has already been made

Tasks:

- 1) Start Image at <https://gisco-services.ec.europa.eu/image> in your Browser. (If in IMAGE already, refresh using F5)

- 2) If IMAGE is already open, **Reset the map by pushing F5 or the**  **icon**

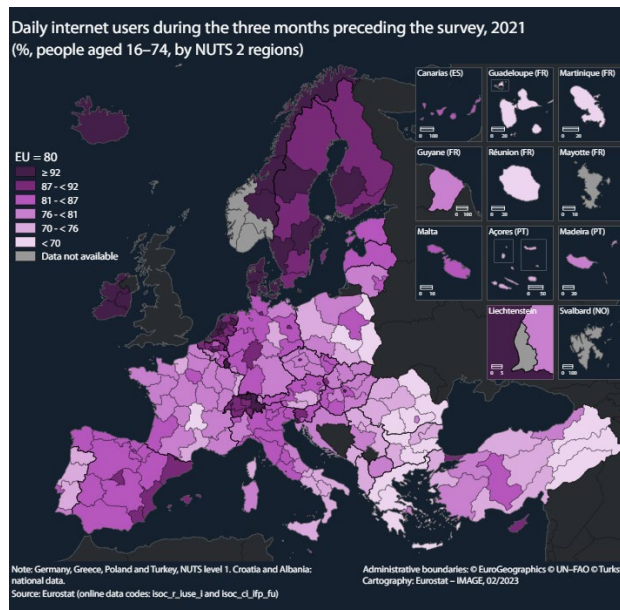

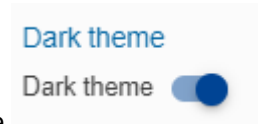

- 3) Load the configuration that was saved at the end of exercise 2 (or \Exercise3\input\exercise3_data.xls)

- 4)  Change the colours scheme to the Palette B under Eurostat style guide

- 5) Lets say we want to use this map in Social media – go to  and choose the Social Media layout for NUTS 2021.

- 6) If the map is for social media, maybe we can show this in a dark theme.

Go to  and switch on the Dark Theme

- 7) Download the map as pdf and as Configuration file. The map is now ready for publication, with a saved configuration file should further changes be needed.
