<b>3.4. Statistical concepts and definitions</b>
For census purposes, the total population of the country consists of all the persons falling within the scope of the census in EU on usual residents.

Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage.

Persons usually resident in the place of enumeration but absent, or expected to be absent, at the time of the census for less than one year shall be considered as temporarily absent persons and thus included in the total usually population. In contrast, persons living or expected to live outside the place of enumeration for one year or more shall not be considered temporarily absent and shall therefore be excluded from the total population. This is regardless of the length of visits that they may pay to their families from time to time.

Persons who are enumerated but do not meet the criteria for usual residence in the place of enumeration, i.e. do not live or do not expect to live in the place of enumeration for a continuous period of at least 12 months, are considered temporarily present and are therefore not counted in the total usually resident population. Unless otherwise stated in this report.

#### **3.4.1. Statistical concepts and definitions - Total population**

For census purposes, the total population of the country consists of all the persons falling within the scope of the census in EU on usual residents.

Usual residence means the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage.

Persons usually resident in the place of enumeration but absent, or expected to be absent, at the time of the census for less than one year shall be considered as temporarily absent persons and thus included in the total usually population. In contrast, persons living or expected to live outside the place of enumeration for one year or more shall not be considered temporarily absent and shall therefore be excluded from the total population. This is regardless of the length of visits that they may pay to their families from time to time.

Persons who are enumerated but do not meet the criteria for usual residence in the place of enumeration, i.e. do not live or do not expect to live in the place of enumeration for a continuous period of at least 12 months, are considered temporarily present and are therefore not counted in the total usually resident population. Unless otherwise stated in this report.

## 10. Accessibility and clarity

[Top](#)

### 10.1. Dissemination format - News release

No regular or ad-hoc press releases are linked to provisional grid data.

### 10.2. Dissemination format - Publications

Provisional grid data is not available in regular or ad-hoc publications.

### 10.3. Dissemination format - online database

Provisional grid data is not available in on-line databases other than the Census Hub.

### 10.4. Dissemination format - microdata access

No micro-data is disseminated in connection with provisional grid data.

### 10.5. Dissemination format - other

No other dissemination in connection with provisional grid data.

### 10.6. Documentation on methodology

Methodological documents will be available in connection with final grid data.

### 10.7. Quality management - documentation

Documentation on quality management will be available in connection with final grid data.

<b>11. Quality management</b>	<a href="#">Top</a>
<b>11.1. Quality assurance</b>	
<p>Since population census in Hungary ended on 28 November 2022 the processing of data is ongoing. Provisional data on total population by grid cells represents annual population estimation data by reference date 31 december 2021. Geographic distribution by 1 km<sup>2</sup> grid cells is based on registered addresses available comprehensively in administrative source on 31 December 2021 (Population and Address Register).</p> <p>Geographic information is based on the complete, geocoded Address Database of the Hungarian Central Statistical Office.</p>	
<b>11.1.1. Lineage</b>	
<p>Since population census in Hungary ended on 28 November 2022 the processing of data is ongoing. Provisional data on total population by grid cells represents annual population estimation data by reference date 31 december 2021. Geographic distribution by 1 km<sup>2</sup> grid cells is based on registered addresses available comprehensively in administrative source on 31 December 2021 (Population and Address Register).</p> <p>Geographic information is based on the complete, geocoded Address Database of the Hungarian Central Statistical Office.</p>	
<b>11.1.2. Conformity, specification</b>	
<p>Geographic information presented on 1 km<sup>2</sup> grid is based on the complete, geocoded Address Database of the Hungarian Central Statistical Office and complies with government decree 241/2009 on the establishment and operation of National Environmental GIS System and in compliance with Directive 2007/2/EC.</p>	
<b>11.1.3. Conformity, degree</b>	
<p>Geographic information presented on 1 km<sup>2</sup> grid is based on the complete, geocoded Address Database of the Hungarian Central Statistical Office and complies with government decree 241/2009 on the establishment and operation of National Environmental GIS System and in compliance with Directive 2007/2/EC.</p>	
<b>11.2. Quality management - assessment</b>	
<p>Total population by 1 km<sup>2</sup> grid cells by reference date 31 December 2021 based on annual population estimation and administrative source as provisional data since population census in Hungary ended on 28 November 2022 and the processing of data is still ongoing.</p>

-

##### 14.1.2. Date of last revision

30/03/2022

##### 14.1.3. Date of creation

30/12/2022

##### 14.2. Punctuality

-

#### 15. Coherence and comparability

[Top](#)

##### 15.1. Comparability - geographical

Geographic distribution by 1 km<sup>2</sup> grid cells is based on registered addresses available comprehensively in administrative source on 31 December 2021 (Population and Address Register). Geographic information is based on the complete, geocoded Address Database of the Hungarian Central Statistical Office.

##### 15.1.1. Geographic information - data quality

Geographic distribution by 1 km<sup>2</sup> grid cells is based on registered addresses available comprehensively in administrative source on 31 December 2021 (Population and Address Register).

Geographic information is based on the complete, geocoded Address Database of the Hungarian Central Statistical Office.

#### 15.2. Comparability - over time

Geographic distribution by 1 km<sup>2</sup> grid cells is based on registered addresses available comprehensively in administrative source on 31 December 2021 (Population and Address Register). Geographic information is based on the complete, geocoded Address Database of the Hungarian Central Statistical Office.

#### 15.3. Coherence - cross domain

-

### 16. Cost and Burden

[Top](#)

-

### 17. Data revision

[Top](#)

#### 17.1. Data revision - policy

Provisional data to be revised later.

#### 17.2. Data revision - practice

Provisional data to be revised later.

### 18. Statistical processing

[Top](#)

#### 18.1. Source data

Provisional census data based on annual population estimation and administrative source since population census in Hungary ended on 28 November 2022 and the processing of data is still ongoing.

### 18.2. Frequency of data collection

Frequency of population census data collection is every 10 years. In Hungary due to the Covid-19 pandemic the population census originally planned for 2021 was carried out in 2022. Census data with the reference date 31 December 2021 are to be calculated from data collected in October-November 2022.

### 18.3. Data collection

Provisional census data based on annual population estimation and administrative source since population census in Hungary ended on 28 November 2022 and the processing of data is still ongoing.

### 18.4. Data validation

Provisional census data based on annual population estimation and administrative source since population census in Hungary ended on 28 November 2022 and the processing of data is still ongoing.

### 18.5. Data compilation

Geographic distribution by 1 km<sup>2</sup> grid cells is based on registered addresses available comprehensively in administrative source on 31 December 2021 (Population and Address Register) as geocoded in the Address Database of the Hungarian Central Statistical Office.

### 18.6. Adjustment

-

## 19. Comment

[Top](#)

Since population census in Hungary ended on 28 November 2022 the processing of data is ongoing. Provisional data on total population by grid cells represents annual population estimation data by reference date 31 december 2021. Geographic distribution by 1 km<sup>2</sup> grid cells is based on registered addresses available comprehensively in administrative source on 31 December 2021 (Population and Address Register).

Geographic information is based on the complete, geocoded Address Database of the Hungarian Central Statistical Office.

Provisional data to be revised later.
